

Lead Consulting and Technical Services

Lead-based paint hazards pose both health and liability risks to property owners. **Atlantic Testing Laboratories (ATL)** assists property owners with reducing risks by providing a systematic approach to conducting lead-based paint services in general accordance with the U.S. Department of Housing and Urban Development (HUD) Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing. **ATL** determines the appropriate evaluation process for the owner's property, including historical research, lead-based paint identification, lead-based paint hazard identification, guidance toward reducing and/or eliminating lead hazards, and preparation of a written report upon completion of the investigation.

Consulting Services

- ◆ Assess the hazards posed by the presence of lead-based paint in accordance with EPA's Identification of Dangerous Levels of Lead (40 CFR Part 745)
- ◆ Recommend appropriate lead hazard control options
- ◆ Educate owners on how to recognize lead-based paint hazards
- ◆ Educate owners on regulatory requirements promulgated by OSHA, EPA, and applicable state regulations

Technical Services

- ◆ Conduct surface-by-surface investigation to determine the presence of lead-based paint
- ◆ Collect paint chip, dust, soil, air, and water samples for analysis
- ◆ Conduct post-lead hazard control work clearances
- ◆ Conduct pre-demolition/renovation lead-based paint investigations in accordance with OSHA – Lead in Construction Standard (29 CFR 1926.62)

Why ATL?

- ◆ Reputation for high-quality workmanship and responsiveness to client needs
- ◆ EPA certified Lead Risk Assessors and Lead Inspectors to provide full service capabilities in the areas of pre-demolition lead surveys, regulatory compliance, abatement monitoring, risk assessments, clearance sampling, and hazard screen assessments
- ◆ Provide an economical consulting solution that will satisfy the project requirements

ATL is a full-service firm offering a comprehensive line of technical support services. These include environmental services, special inspection services, subsurface investigations, water-based investigations, geotechnical engineering, construction materials engineering and testing, pavement engineering, nondestructive testing, stormwater pollution prevention planning, and surveying from our 11 offices.
