

Underground Storage Tank Services

Increased environmental concerns over corrosion and potential petroleum leaks, have prompted banks and other lending institutions to join the Department of Environmental Conservation (DEC) in requiring testing of Underground Storage Tanks (UST) for residential and commercial use. **Atlantic Testing Laboratories (ATL)** uses modern equipment for DEC approved inspection and testing of underground tanks.

Petroleum UST Regulations

In accordance with NYSDEC regulations part 613.5a, tank tightness testing must occur every five years after an initial test of any registered tank.

Annual monitoring of the Cathodic Protection System in accordance with NYSDEC regulations part 613.5b provides the DEC required monitoring and an on-premises annual record.

Underground Storage Tank Inspection Ser-

- ♦ EZY 3 Locator Plus system non-volumetric tank tightness test
- ♦ EZY CHEK Systems product line testing
- ♦ EZY CHEK leak detector testing
- ♦ Cathodic protection testing

Why ATL?

- ♦ Estabrook's EZY CHEK Systems certified technicians
- ♦ Provides State and Federal UST testing requirements
- ♦ Extensive knowledge and experience in the area of petroleum UST evaluations, compliance reporting, Spill Prevention, Control, and Countermeasure (SPCC) plans, and other related areas
- ♦ Broad range of capabilities, coupled with the diverse expertise of technical staff, facilitates efficient and cost effective execution of UST management phases, from initial SPCC plans to the tank integrity and regulatory compliance evaluations

ATL is a full-service firm offering a comprehensive line of technical support services. These include special inspection services, subsurface investigations, water-based investigations, geotechnical engineering, construction materials engineering and testing, pavement engineering, nondestructive testing, stormwater pollution prevention planning, and surveying from our 11 offices.
