

Fenestration Testing Services

WBE certified company

Fenestration refers to openings in a building, such as windows, doors, skylights, sloped glazing, curtain walls, and storefronts, which are designed to permit the passage of air, light, and/or people. Fenestration products are the individual assemblies used to cover these openings and selectively allow for desired elements to pass through, while restricting the flow of others. Field testing the installation of these products helps fulfill project requirements and confirm the installed products meet industry standards.

Field Testing Services

- **ASTM E1105:** Standard Test Method for Field Determination of Water Penetration of Installed Exterior Windows, Skylights, Doors, and Curtain Walls by Uniform or Cyclic Static Air Pressure
- **ASTM E783:** Standard Test Method for Field Measurement of Air Leakage Through Installed Exterior Windows and Doors
- **ASTM C1401:** Standard Guide for Structural Sealant Glazing
- **AAMA 501.2:** Quality Assurance and Water Field Check of Installed Storefronts, Curtain Walls and Sloped Glazing Systems
- **AAMA 502:** Voluntary Specification for Field Testing of Newly Installed Fenestration Products
- **AAMA 503:** Voluntary Specification for Field Testing of Newly Installed Storefronts, Curtain Walls, and Sloped Glazing Systems

What Differentiates ATL?

- Fenestration and Glazing Industry Alliance (FGIA) Accredited Field Test Agency
- American Architectural Manufacturers Association (AAMA) Fenestration Associate Professional Certifications
- Strategically located across New York State to provide a responsive and cost effective solution
- WBE Certified
